# Ali ELOUAHED

SOC Analyst with over 3 years of experience in cyber security operations, specializing in security monitoring, threat detection, and incident response. Experienced in designing and operating virtualized lab environments to simulate real-world attacks and validate detection capabilities. Combines strong systems and network administration expertise with a proactive, hands-on approach to security analysis and automation.

**SOC Analyst | Cyber Security Operations**

Elouahedali@gmail.com

Sonelgaz street N° 10, Ben Aknoun, Algiers

My Portfolio Website

## SKILLS

**Security & Monitoring:**
Incident Response, Threat Detection, Log Analysis
**Systems & Networking:**
Windows Server, Linux, firewall, Network Monitoring.
**Tools:**
Pen-testing , information gathering , vulnerability and exploits .
**Programming:**
Python (automation, scripting, tool customization)

## LANGUAGES

- Arabic (Native),
- French (Moderate),
- English (Fluent)

## INTERESTS

Cyber security Research, Volunteering, Sports, Health & Well-being, Emerging Technologies, Gaming.

## EXPERIENCE

***Information Systems Security Manager / Systems Administrator***

*Medical & Social Center, Kolea* |May 2022-Present.

- Designed and implemented security strategies to ensure system resilience and service
- Deployed and managed monitoring and logging solutions for proactive incident detection
- Led system hardening, access control, and risk mitigation processes
- Ensured continuous monitoring of infrastructure and rapid response to security events

***Network Administrator* (Internship)**

*Etterkib SPA* | Sept 2019 – March 2020

Managed the company's computer park and performed network supervision GLPI.

- Deployed and configured an Ubuntu Linux server.
- Implemented monitoring solutions using OCS Inventory and Nagios XI for real-time network and system status reporting.

***Application Developer* (Internship)**

Technical School of Blida | Jan 2018 – April 2018

- developed an application for trainee evaluation management

## EDUCATION

***Associate's Degree (BTS) in Network and Computer Systems (Continuous vocational training)***

- *The National Institute of Professional Training AIG «Khalil Ziyat», Blida* | Sept 2016– June 2020

***Completion Certificate TryHackMe Advent of Cyber Course***

- (Basic Cyber security Knowledge and Experience) June 1, 2021

# TECHNICAL SKILLS

## CYBERSECURITY LAB EXPERIENCE

•Infrastructure: Designed and maintained a multi-node virtualized environment sandbox using VMware to simulate a corporate network architecture.
•Network Security: Deployed pfSense as a perimeter firewall, configuring VLAN segmentation and strict firewall rules to isolate sensitive segments.
•Defense Stack: Built and integrated a unified SIEM environment using Wazuh and Splunk for centralized log collection and security monitoring.
•Incident Management: Integrated IRIS for automated alert triage and structured case management, mimicking professional SOC workflows.
•Threat Validation: Executed controlled attack scenarios—including brute-force and lateral movement—to build, test, and tune custom detection rules.

## OFFENSIVE SECURITY (PENTESTING)

•Enumeration & Discovery: Nmap, DirBuster.

•Exploitation: MSFvenom (Metasploit), Hydra, Burp Suite.
•
•Assessments: Vulnerability and exploits , information gathering , and web application testing.

## DEFENSIVE SECURITY (SOC / BLUE TEAM)

- SIEM & Logging: Splunk, Wazuh.
- Incident Response: IRIS (Alert triage & case management).
- Analysis: Log analysis , threat detection , and attack pattern identification (brute-force, lateral movement).
