Ali ELOUAHED

SOC Analyst with over 3 years of experience in cyber security operations, specializing in security monitoring, threat detection, and incident response. Experienced in designing and operating virtualized lab environments to simulate real-world attacks and validate detection capabilities. Combines strong systems and network administration expertise with a proactive, hands-on approach to security analysis and automation.

My Portfolio Website

SKILLS

Security & Monitoring:
Incident Response, Threat Detection, Log Analysis
Systems & Networking:
Windows Server, Linux, firewall, Network Monitoring.
Tools:
Pen-testing , information gathering , vulnerability and exploits .
Programming:
Python (automation, scripting, tool customization)

LANGUAGES

- Arabic (Native),
- French (Moderate),
- English (Fluent)

INTERESTS

Cyber security Research, Volunteering, Sports, Health & Well-being, Emerging Technologies, Gaming.

EXPERIENCE

Information Systems Security Manager / Systems Administrator

***Medical & Social Center, Kolea* |May 2022-Present.**

- Implemented and supported Information Security controls to identify risks and help prevent data breaches, aligned with ISO 27001 standards.
- Deployed and managed monitoring and logging solutions for proactive incident detection
- Ensured continuous monitoring of infrastructure and rapid response to security events

***Network Administrator* (Internship)**

***Etterkib SPA* | Sept 2019 – March 2020**

- Managed the company's computer park and performed network supervision Using GLPI.
- Deployed and configured an Ubuntu Linux server.
- Implemented monitoring solutions using OCS Inventory and Nagios XI for real-time network and system status reporting.

***Application Developer* (Internship)**

Technical School of Blida | Jan 2018 – April 2018

- developed an application for trainee evaluation management

EDUCATION

Associate's Degree (BTS) in Network and Computer Systems (Continuous vocational training)

- *The National Institute of Professional Training AIG «Khalil Ziyat», Blida* | Sept 2016– June 2020

Completion Certificate TryHackMe Advent of Cyber Course

- (Basic Cyber security Knowledge and Experience) June 1, 2021

TECHNICAL SKILLS

CYBERSECURITY LAB EXPERIENCE

- Designed a virtualized lab (VMware) simulating an enterprise network.
- Implemented a SIEM (Wazuh, Splunk) for monitoring.
- Automated incident triage using IRIS.
- Conducted attack simulations (brute force, lateral movement) to enhance detection.

OFFENSIVE SECURITY (PENTESTING)

- Enumeration & Discovery: Nmap, DirBuster.
- Exploitation: MSFvenom (Metasploit), Hydra, Burp Suite.
- Assessments: Vulnerability and exploits , information gathering , and web application testing.

DEFENSIVE SECURITY (SOC / BLUE TEAM)

- SIEM & Logging: Splunk, Wazuh.
- Incident Response: IRIS (Alert triage & case management).
- Analysis: Log analysis , threat detection , and attack pattern identification.
